

A TOUR OF THE DEMO VESSEL MY ADRYN

# The whole boat, on every phone aboard.

---

What's open, what's running, who's on watch and where the cars are. Whoever changes it, everyone else sees it the moment they look.

Every screen in this document is the real product, running with example data. Built aboard a working yacht by an ETO who has done the job.

# One screen for the state of the boat

The screenshot displays a comprehensive status board for a vessel, organized into several functional panels. At the top, a header bar includes the user profile of Captain Sam Hale, navigation links for Vehicles, Status Board, Vessel, and Admin, and a time indicator of 11:46 UTC+2. Below the header, a central status strip provides a quick overview of key metrics: VHF channel (72), 2 doors open, 3 guests onboard, 1 guest ashore, and LIMO TENDER: ON MISSION. A warning for EXHAUST LAGGING RENEWAL is also present. The main area is divided into six panels: 1. HULL OPENINGS: A grid showing the status of various openings (Passerelle, Tender garage, Beach club door, Bunker hatch, port, Bunker hatch, starboard) as either OPEN or CLOSED. 2. GUESTS: A list of four guests with their roles, contact info, and status (onboard or ashore). 3. CREW WATCH & ON-CALL: A list of crew members assigned to different watch positions (Bridge, Deck, Engineering) with buttons to manage their status. 4. TENDERS: A section for tracking the status of three tenders (Limo, Open, Rescue) and their associated comms and refueling activities. 5. PERMITS TO WORK: A list of active and closed permits for specific work areas like the engine room and upper platform. 6. GENERAL COMMENTS & ISOLATION: A log of recent events and comments, such as power drops and fender incidents, with a severity indicator (MINOR).

### ANCHORS

Hull openings, guests, crew on watch, tenders, permits to work, the running log, today's schedule and the anchors, all on one board and updated live. The strip along the top rolls up what needs attention: doors open, guests aboard, a tender out, an active hot-work permit.

ON EVERY PHONE

# The same board in every pocket

- **Nothing to install.** It runs in the browser on any phone, tablet or bridge screen.
- **Sign in by email link.** Crew get a link, so there are no passwords to forget.
- **Crew Watch & On-Call** shows who's on, by department, with sort and filter.
- **Every change carries a name,** logged with who made it and when.
- **Your words:** panels, buttons and states are named the way your crew already talk.

## Where each car is, and who has it

- **Take out, bring back, reserve:** one press each, from the phone in your hand.
- **Who has the keys,** and when it's due back.
- **Fuel level and mileage** at every hand-over.
- **Bookings** for the airport run or the provisioning trip, made before anyone takes the car.
- The same log works for **tenders, jet skis, e-bikes and tools**, or anything else you sign out.

## THE HISTORY

# Every trip, on the record

Each car keeps its own log: who took it, when, where to, the fuel and the mileage out and back, and where it was left. Upcoming bookings sit alongside, so a clash shows up before it happens.

Equipment gets a printed code too. Scan it with a phone camera and you land on that item's log.
